Digital Services

Brand new: ARI Digital Services

myARI – Your service and information portal
myValve – Your valve sizing program, now also available online

myPREMIO – The new app for your electronic actuators
ARI-ID – Digital product information

myARI – Your portal

The new portal myARI is a modern service and information channel which you can access 24/7 regardless of whether or not we can also be reached in person. It provides you with a quick, easy and convenient way to check your order or delivery status at any time of the day or night. You can additionally use myARI to notify us of repairs, returns or complaints.

myValve now available online

In future, by registering in the portal myARI you also have access to the online version of myValve®, the ARI sizing program. All calculations for your control and safety valves can now be performed without actually installing the software. A few simple steps are all you need to register in the portal myARI and take advantage of the services and information on offer there or use myValve online. The scope of services is constantly being expanded.
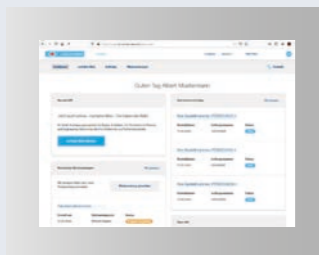

myPREMIO – The actuator app

The optional BT interface allows this app to communicate with PREMIO®-Plus 2G actuators. Profit from the new app's exciting functionality:

- Control: Use the app to control a selected actuator.
- Diagnostics: Display status information, statistics, event logs, trends and histograms or configure additional functions.
- Data exchange: Exchange diagnostic data with ARI Customer Service for even more efficient support
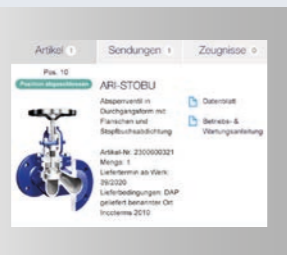

ARI-ID – Product information

The ARI-ID is an integral part of each ARI valve. The ARI-ID is a globally unique code that enables every ARI valve to be clearly identified.

- Your time saving: On-site scanning of the ARI-ID with a smartphone
- Your convenience: All product information and spare parts at a glance
- Your security: Secure check-out process in ARI logistics

The myARI Portal is a modern service and information channel.

With myARI, you can see all shipments at a glance at any time.

Quick and easy sizing of your safety and control valves with the online version of myValve.

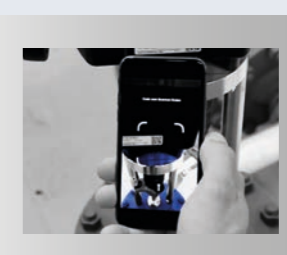

Characteristics and pressure / temperature diagrams of your online data.

myPREMIO app for control, diagnostics and data exchange with your PREMIO actuator.

Please ask info.sales@ari-armaturen.com for a download link and details of how to install the app.

The ARI-ID – Quick access to all digital, product-specific information directly on the name plate.

The ARI-ID leads you to the "ARI-ID" website, which provides extensive information e.g. regarding our ZETRIX® process valve as well as its spare parts.

ARI product diversity

Control

Control valves
STEVI® Pro
(Series 422/462, 470/471)

STEVI® Vario
(Series 448/449)

STEVI® Smart (Series 423/463, 425/426,440/441, 450/451)

Control without auxiliary power
PREDU® / PREDEX® / PRESO® / TEMPTROL®

Isolation

Process valves
ZETRIX®
High performance-Valves
ZEDOX®

Butterfly valves
ZESA®/GESA®/ZIVA®

Bellows sealed valves
FABA® Plus, FABA® Supra I/C

Stop valves with gland seal
STOBU®

Safety

Safety valves (DIN/EN)
SAFE

Safety valves (DIN/EN)
SAFE TCP

Safety valves (API 526, ASME)
REYCO® R

Safety valves (ASME)
REYCO® RL

Steam trapping

Steam traps CONA®
(mechanical ball float / thermostatic bimetallic and membrane / thermodynamic),
monitoring systems
CONA® Control

Manifolds
CODI® for collecting and diverting purpose

Steam trap with multi-valving technology CONA®
"All-in-One" (incl. stop valve, inside strainer, back-flow protection, drain valve)

Mechanical pump systems
CONLIFT®, CONA® P

Edition 04/2021 - Data subject to alteration

Profit from diversity made by ARI.
Please don't hesitate to ask for more information!
